5. Confidence Score Analysis

This section would provide insights into the confidence scores of object detection and classification, if an ML model was integrated. Analysis could include average confidence, distribution of scores, and low-confidence outliers.

6. System Performance Metrics

This section would detail system performance, such as processing speed, uptime, and resource utilization, if a complete system was being monitored.

7. Recommendations

Based on the analysis, here are some recommendations:

- Review high-discrepancy items for potential process improvements or training needs.
- Investigate consistently low confidence scores to improve image quality or model accuracy.
- Implement regular inventory audits to cross-reference with reported discrepancies.
- Ensure clear labeling and consistent lighting for optimal object detection.
